BREEZE 11'0

Like the 10'6 BEACH, the 11'0 BREEZE is an inflatable SUP package that is great value and ideal for use by the whole family. The 11'0 BREEZE is designed more for SUP specific use, as a longer length (11'0) and narrower width (30"), combined together with a 6" thickness. It makes it ideal for progressing into touring or fitness SUP, given that the board has great glide and stiffness. SUP paddling is a breeze at the beach, on calm rivers or lakes or any body of water suitable for learning to SUP. The 11' BREEZE is made with high quality Dropstitch material and includes everything you need to get-out-on-the-water (paddle, leash, pump, bag...).

Key features & benefits

- 1- 11'0 length x 30" width x 6" thickness: ideal for progressing into touring or fitness SUP, given that the board has great glide and stiffness.
- 2- 3/4 deck pad for good comfort, whatever the use of the product: SUP, Kayak or kids' platform; and a lighter weight vs. a full deck pad.
- 3- Front deck elastic: secures accessories on the water (buoyancy aids, flip flops, dry bags...).
- 4- Sold as a complete pack: board, 3pc travel paddle, leash, backpack transport bag, pump, repair kit & fins (excluding personal flotation & protection).
- 5- Inflatable construction: board is very easy to transport and store.
